

Consent for Emergency Treatment

Your Name: _____

Cat's Name: _____

Phone Number: _____

Initial examination indicates that your cat needs immediate medical attention. The cost for this initial care could range from **\$300 to \$400** and typically includes an intravenous catheter, intravenous fluids, oxygen, heat, basic blood work, and pain medications. This estimate is for initial stabilization **only** and does not include continued care once your pet is stabilized, nor does this estimate include hospitalization, treatments, medications, or follow-up care.

The veterinarian will update you as soon as possible. At that time, we will provide you with a written estimate of expected charges for continued care. A deposit will be required for patients remaining in the hospital for continued care.

Please read and select one of the below:

- I give permission for immediate medical care and will be financially responsible for the incurred charges on the date of services. I understand that emergency treatment does not guarantee the survival of my cat. I understand that it is my obligation to pay in full for all services provided at the time services are rendered.
- I **do not** authorize immediate treatment and want to speak to a doctor first. I understand that delaying necessary treatment could jeopardize the health of my pet. I release Atrium Cat

Hospital and its doctors and staff from liability from any complications related to my choice to delay treatment.

Please read and select one of the below:

In the event that my cat stops breathing or his/her heart stops beating, I request that the doctor and staff of Atrium Cat Hospital pursue such medical care as indicated below (choose ONE):

- I request that cardiopulmonary resuscitation (CPR) be performed in the event that my cat stops breathing or his heart stops beating.
- I request that CPR NOT be performed in the event that my cat stops breathing or his heart stops beating. I understand that this will result in the death of my cat.
